## **JOINT TYPES:**

CONTRACTION OR  
CONSTRUCTION JOINT

ISOLATION JOINT

A 10x10 grid diagram with red and blue lines. The grid is overlaid with several colored regions: a large green area at the top left, a smaller green area in the center-left, and a small yellow area in the bottom right. Red lines form a complex path that starts in the top-left green area, moves through the center, and ends near the bottom-right yellow area. There are also red lines forming a boundary around the central green area. The grid has red dots at its intersections. Numbered circles (1 through 6) are placed at specific grid points: circle 1 is at (1, 1), circle 2 is at (2, 1), circle 3 is at (3, 1), circle 4 is at (4, 1), circle 5 is at (5, 1), and circle 6 is at (6, 1). A black line connects circle 5 to circle 6.
